

TIMES CHANGE

DINGLEY DELL

ST. MORITZ

So does SHELL

People go further afield now than Dingley Dell for their Winter sports and they prefer more violent exercise than skating. It is just another part of the general speed-up of living which the motor car has largely brought about. The motor engine of to-day is a very different affair from its counterpart of thirty years ago. It is capable of three times the speed and makes a much heavier demand upon the petrol. Shell has always changed to suit new developments in the mechanism of the engine, and so maintains its reputation for high quality and excellent performance.

YOU CAN BE SURE OF SHELL

Kindly mention "Flight" when corresponding with advertisers.
